

Incident Response and Recovery

DURATION

3 days

CONTACT HOURS

18

LEVEL

Advanced

FEE PER DELEGATE

US\$1,200

Run a security incident from detection to recovery, including the decisions that have to be made under pressure.

Incident response is a management problem as much as a technical one. This programme runs delegates through detection, containment, eradication and recovery, and through the decisions that surround them: when to disconnect, who to tell, what to say, and when to involve law enforcement or a regulator.

Available as classroom, live online, in house.

Who it is for

Security and IT staff, incident managers, and executives who would be involved in a major incident.

What you will be able to do

- Run the phases of incident response in the right order.
- Make containment decisions that balance evidence against ongoing harm.
- Meet notification obligations without over disclosing.
- Recover in a way that does not restore the compromise.

The outline

DAY 1

Detection and containment

Recognising an incident · Triage and severity · Containment against evidence preservation · Communication in the first hour

DAY 2

Investigation and notification

Scoping the compromise · Evidence handling · Regulatory and contractual notification · What to say publicly

DAY 3

Recovery and after

Eradication and validated recovery · Restoring without restoring the compromise · Post incident review · Turning findings into controls

What you leave with

- An incident response plan with defined roles.
- A containment decision guide.
- A notification checklist with timings.
- A recovery validation approach.

Published dates

DATES	WHERE	FEE
23 to 25 November 2026	Port Louis, Mauritius	US\$1,200
30 November 2026 to 2 December 2026	Nicosia, Cyprus	US\$1,200
