MINING ENGINEERING

Mining Industry Regulations and Compliance

DURATION	CONTACT HOURS	LEVEL	FEE PER DELEGATE
5 days	30	Intermediate	US$1,500

Building a compliance system that covers mining's overlapping legal obligations without drowning in them.

A mine answers to mining legislation, health and safety law, environmental law, water law and its own licence conditions at the same time, and they do not align neatly. This week builds the system that holds them together: a register of what applies, assigned ownership, evidence of compliance, and an audit routine that finds a gap before an inspector does. The structure is transferable, since it holds wherever you operate even though the statutes differ.

Available as classroom, live online, in house.

Who it is for

Compliance and legal officers, environmental and safety managers, mine managers with statutory duties, and auditors working in the sector.

What you will be able to do

- Build a legal register covering every instrument that applies.
- Translate a licence condition into an operational control with an owner.
- Hold evidence that would satisfy an inspection.
- Run a compliance audit and close findings properly.
- Manage an inspection, a notice and a breach.

The outline

DAY 1

The obligations

Mining, safety, environmental and water instruments, and where they overlap · Licence and permit conditions as binding obligations · Statutory appointments and personal liability

DAY 2

The register

Capturing what applies, and keeping it current · Translating an obligation into a control · Ownership and accountability

DAY 3

Evidence

Records, monitoring data and reports · Retention and retrieval · What an inspector asks for first

DAY 4

Assurance

Self audit programmes · Finding classification and closure · Third party and corporate audit

DAY 5

When it goes wrong

Handling an inspection · Notices, directives and stop work orders · Disclosure, investigation and remediation

What you leave with

- A legal and licence register for one operation.
- A compliance calendar with owners and due dates.
- An inspection readiness pack.

Published dates
